

Our new website has launched!

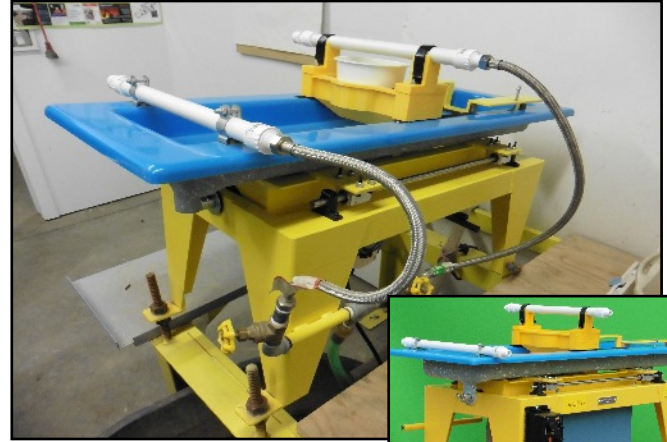

We're very excited about our new look!!

It's clean & modern and much easier to navigate, as well as viewing across different platforms and devices. Secure online shopping has improved as well.

While we still sell chemicals, restrictions on size and shipment methods have kept us from listing most on the website storefront. Please call or email us with your list and we'll do up a sales order quote for you and go over shipping options.

Keep checking back with us for updates and take a look yourself at www.actionmining.com! Please note, we are still adding features. All our videos are still available as well as old and new photos. Our catalogs and instructions are faster loading too. Here's to a new era!

2017 Model M5 Wave Table™

Above, shown with 20 mesh classifier screen & mounted on M5 Stand (optional)

On the right, 110/220V model

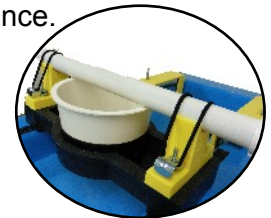

Perfect for your lab!

You'll be up and running in minutes.
View website for spec sheet & more info.

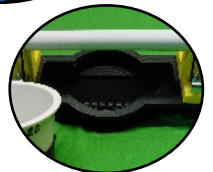

In 2012, we introduced the newly designed M5 - the standard portable **12V** Field Model M5. In 2013, we introduced the **110V and 220V Models M5** with a variable speed control. In 2014, we updated the feed trough to hold more material. For 2015, we updated the feed trough to accommodate our small screens (20 mesh screen included, others sold separately) so that you can run specific classification mesh sizes in your testing or clean up runs!! In 2017, we've improved the feed troughs, machined from solid ultrahigh density black PE for incredible endurance.

2017 models:

M5 12V	\$4275
M5 110/220V, 50/60c	\$4275
M5 220CV 50/60c	\$4610

For those of you who have an older M5 model, our new trough (\$79) is available as an upgrade.

Classifiers sold separately:

Set (10,20,40,60 mesh+bottom)	\$44
30 mesh pan	\$12
50 mesh pan	\$12
100 mesh pan	\$12

Stock room

Assembly area

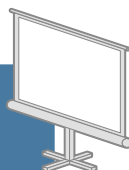

Remember, if you need any supplies we're just a phone call (1 800 624 1511) away!! And we will do our best to get the items to you quickly.

NEW- M5 & M7/8 video (1+hr) online

at our website covering introductions, adjustments, speeds, calculations, testing & production runs.

Training room

**Newest Product- Hand operated
Magnetic Separator**

New items!

- Easy to use - constant hand feed material
- Separates magnetics quickly from black sands and other material
- Perfect for field or laboratory testing - weighs just 20 lbs
- Commercial grade 1/8" rubber conveyor belt material
- Magnetic roller ensures constant separation
- Durable polyethylene framework

Water hose (not included) is attached to separator fitting. This washes the ore into the first collection bucket while the magnetics are automatically dropped off the belt into the second bucket.

Limited time offer introductory price: **\$899** (regular \$995.00). UPS S&H not included. (Collection buckets not included.)

See our website actionmining.com for a short video clip on the operation of the hand operated magnetic separator

SPECIAL

With the purchase of the [Beginners Assay Kit](#) (or [Advanced Kit](#)), you will receive our **Fire Assay Home Study Course and DVD Bundle (\$99 value) for FREE.**

Mention promo code "Video Bundle".

New book by Hank Chapman - "How to Mill Your Gold & Silver" Hank's new book just released! Over 100 pages of his experience and insight on determining if a mining property will be profitable for you and then how to actually run it.
Cat#BOOK-MILL Price \$54.95

Happy New Year!! 2016 was very

volatile for the mining industry, including gold. The pre-election craziness distracted everyone worldwide. The post-election months have left the mining industry uncertain as to rules, regulations, and permitting. Rightly so, there is a lot of attention on safety and cleaner methods of recovery. Our Wave Tables not only give you a great concentrate and can separate free gold out of black sands, but also recover mercury from streams and contaminated sites. For 36 years, we've been attentive to the environment, long before it became fashionable. Our Wave Tables are also great for most e-scrap, giving us an edge at the front end of mining and the back end.

2017 gold price predictions are conflicting. AMS has seen a lot of ups and downs since 1979 - gold as low as \$200 and as high as \$1850 and everything in between - we're still here...and appreciate your support!! Here's hoping it all settles down in early 2017 so we all can 'just get on with it'.
